New Hope in an Ongoing Fight

It is a period of civil war.

Rebel spaceships, striking from a hidden base, have won their first victory against the evil Galactic Empire.

During the battle, Rebel spies managed to steal secret plans to the Empire's ultimate weapon, the Death Star, an armored space station with enough power to destroy an entire planet.

Pursued by the Empire's sinister agents, Princess Leia races home aboard her starship, custodian of the stolen plans that can save her people and restore freedom to the galaxy . . .

"May the Force be with You!"

Your Star Wars odyssey is an astounding challenge where only split-second maneuvering and dead-eye shooting can keep you in the pilot's seat.

Each mission is timed and scored, and these numbers always appear at the top of the screen.

HIGH SCORE/GUNNER'S SCORE

In 1 Player games, this shows the highest score earned. Beat this number and you can put your name at the top of the High Score screen.

In 2 Player games, the gunner's score is tallied here.

TIMER

The seconds count down fast. You must destroy all targets to complete your mission before the timer runs out, or the galaxy will be lost!

PILOT'S SCORE

Watch your points add up as your lasers and proton torpedoes hit their mark.

Combat Display

You can conduct your galactic war from two combat views:

- **Cockpit View** — You're at the controls inside your starfighter, viewing the battle from the pilot's seat.
- **Chase View** — Follow your starfighter into battle, watching the action from outside the ship.

Both views display vital combat information. Press **Button Z** (on the 6-Button Arcade Pad) or the **Start** button (on the 3-button controller) to switch views at any time.

COMBAT WINDOW

Shows the ongoing battle and combat alerts from mission control. Pay attention — they could save your butt!

SHIELDS

The Starfighter's protective shields disintegrate with continued damage. When you lose your last one, it's time to think about a desk job.

RADAR SCREEN

Shows incoming attackers in Cockpit view. Your Starfighter is always at the center of the display.

PROTON TORPEDOES

Keeps track of your remaining proton torpedo load. Fire your torpedoes for mass destruction when surrounded. You enter battle with a limited amount, so use them wisely — but be sure to use them up. You start each new level with fully recharged proton torpedoes.

YOUR STARFIGHTER

Your starfighter is always at the center of the action in Chase view.

REMAINING TARGET COUNT

You must destroy an increasing number of enemy fighters with each new mission. This counter tracks the number of targets remaining.

Blaster
Sight

You speed into explosive space action with two weapons at your control: laser cannons and proton torpedoes.

LASER CANNONS

This weapon is always available, with unlimited firepower. Your shots are directed by the small white laser gunsight in the center of the combat window. Watch incoming bogies and time your blasts for when they'll fly within your sight. If you play it right, you can't miss.

PROTON TORPEDOES

These heavy weapons deliver massive destruction. The large white proton torpedo targeting sight homes in on bogies automatically. When it locks on, you fire.

The sight must be locked on, or your shot will be wasted. That could be a fatal mistake, since your number of torpedoes per level is limited.

When the game is over, you'll see your final score, and your Gunner's score in 2 Player games.

High Score

If you've racked up an exceptional score, you'll be able to enter your name (up to 3 initials) on the High Score screen.
